23. Problem: (use additional Sheets if necessary)
ECS Tickets must be maintained in the VDB to ensure that their verification is recorded by EOC. This ticket was submitted to the VDB under CCR 02-0204 but the ticket blew up upon implementation in the VDB. Upon advice of a VDB auditor, it was held until implementation of CCR 02-0215 which deleted some related tickets. In the interim, users have been instructed to obtain the ticket from the U-drive Tickets directory.

24. Proposed Solution: (use additional sheets if necessary)
Add ticket RH_ZZ_01 to the VDB
Note: Unless marked NEW the requirements and requirement mappings in this ticket are already in the VDB.
Requirements with keys 4043 and 4229 have been deleted and replaced by new requirements. The ticket is hereby re-submitted.
See Sheet 2 for more implementation instructions.

25. Alternate Solution: (use additional sheets if necessary)

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
No data in VDB to record verification of L3 requirement. Lien on the L3 requirement at EOC.

Title of Change: Baseline Ticket RH_ZZ_01, ASTER Ingest via Sony DTF-2

The ticket changes to enable its entry in the VDB are based on an e-mail from Shirley Gasch entitled "Re: Approved Verification Database #150", which is furnished as an attachment to this CCR. Requirements S-INS-03110 and S-INS-03115 are being deleted from the ticket but not from the VDB. Both development capabilities in the ticket (0032IN and 0032ST) are new and must be mapped to the L4s.
